

Dear Medicare Patients:

**Achieve Orthopedic Rehab Institute's** goal is to provide the highest quality **Physical Therapy** services to our patients. With the recent update Medicare allows **\$2,150.<sup>00</sup>** amount for Physical Therapy and Speech Therapy benefits. If you qualify for what is called a KX modifier, treatment can continue above and beyond this dollar amount when deemed medically necessary. Please consult with your therapist as to whether or not this would apply. Based on the **\$2,150.<sup>00</sup>** amount, the average number of Physical Therapy and Speech Therapy visits in any office will be **14-17** annually before the KX modifier goes into effect on your account. Your visit limit with us **may be lower** depending on your use of Physical Therapy and Speech Therapy you may have received from other facilities during the same calendar year prior to attending Physical Therapy at Achieve Orthopedic Rehab Institute. Your Physical Therapy and Speech Therapy will be subject to Medical Review after exceeding **\$3,000.<sup>00</sup>** annually. When this amount is exceeded, discussions with your Physical Therapist regarding continuation of therapy and plan of care will be determined. Medicare covers 80%, should you carry a supplemental plan they typically cover the remaining 20%. Please keep in mind that a deductible may apply.

*“For physical therapy and speech language pathology services combined, the limit on incurred expenses is \$2,150.<sup>00</sup> for the 2022 calendar year. Deductible and co-insurance amounts applied to therapy services count toward the amount accrued before a cap is reached. Services that meet the exceptions criteria and report the KX modifier will be paid beyond this limit.”*

**Please inform us if you received any Physical or Speech Therapy services in 2022 prior to attending Physical Therapy in our clinic.**

If you have received, or are still receiving, Home Health Physical Therapy, your insurance will not cover out-patient physical therapy until you have been **DISCHARGED** from your Home Health Physical Therapy. If you continue to do Home Health Physical Therapy and want to begin out-patient physical therapy with Achieve Orthopedic Rehabilitation Institute, then you as a Patient are responsible for each out-patient visit until you complete your Home Health Physical Therapy to cover the appointments. This will not apply if your home health provider has completed your discharge process. To ensure coverage please confirm with your home health provider.

PATIENT SIGNATURE CERTIFIES THAT YOU ARE AWARE OF BENEFITS.

If you have any questions please ask the Front Administrative staff for more information. **Patient**
